

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 October 2022
Team ID	PNT2022TMID27288
Project Name	Project – A Novel Method for Handwritten Digit Recognition
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through the form
FR-2	User Login	Login through registered Username and Password
FR-3	Uploading images	Should be able to input the handwritten images into the application
FR-4	Recognising digits	Display the recognized digits from the input images to the user

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application needs to respond smoothly so that the user can use the application effectively and need to be an user friendly application.
NFR-2	Security	Ensure the security of application by authenticating the users using their user name and password.
NFR-3	Reliability	The application doesn't show any error during the recognition of the digits from the uploaded images
NFR-4	Performance	Needs to respond fast and provide the output even for the complex handwriting.
NFR-5	Availability	Needs to be available for all users at any time and can get the handwritten images as input to the application easily.
NFR-6	Scalability	It can handle N number of users at the simultaneously with fast response and recognizes the digits effectively.
